Weathering a tornado of change

THIS WEEK'S TOPIC: How is your organisation gearing up for the impact and challenges, if the Covid-19 pandemic should last a year or longer?

Aaron Lee

Chief Executive Officer

Gabkotech Innovations

Prevention is better than cure. At this critical juncture, we encourage and practise social distancing and remote working, and step up personal hygiene at the workplace. As a local SME, we gain from the use of mobile and sensor technologies to automate workflow and processes, as well as healthcare and security measures such as temperature-taking and surveillance, so as to minimise human contact while ensuring productivity and business continuity in the long run. With the help of technology, we are able to monitor the situation closely and remain nimble in responding to fast-changing requirements and challenges. We can all do our part in containing the spread of the virus, by first being socially conscious and responsible for our own actions.
